Implement your Own Ping Program:-

Aim:-

To implement a ping program using a python to check the connectivity between source and destination host.

Algorithm:

1) Get the destination IP address from user.
2) Send the request to destination.
3) Wait for response.
4) Calculate the response time.
5) Display whether the host is reachable.
6) Repeat the process for few requests

Code:-

```
import os
import time
host = input("Enter host: ")
for i in range(4):
    start = time.time()
    result = os.system("ping -n 1 " + host
+ ">null")
    end = time.time()
```

```
        if result == 0:
            print("Reply from ", host,
"Time = ", round((end - start)*1000, 2), "ms")
        else:
            print("Request timed out")
        time.sleep(1)
```

Input:

Enter host : 127.0.0.1

Output:

Reply from 127.0.0.1 Time = 1.23ms

Reply from 127.0.0.1 Time = 0.98ms

Result:

The ping program was successfully studied and implemented
